ANNIE GUNS: 16806 CHESTERFIELD AIRPORT RD, CHESTERFIELD, MO 63005

REGISTRATION: Click or Scan QR Code

CE Credits: 2 Hours | Tuition: Complimentary

Numerous details are indispensable to achieve excellent and long-lasting outcomes in Implant Dentistry. Among them is the increasing need for bone and soft tissue augmentation, in both vertical and horizontal aspects. However, different graft materials can be applied at different moments of the treatment, according to the clinical situation. Immediate or delayed implant placement, ridge preservation procedures and staged grafts are the possible surgical choices to rehabilitate patients in need of implants.

Learning Objectives:

- Assess the surgical risk in patients in need for extraction and implants.
- Recognize different moments for implant placement in relation to the extraction.
- Select clinical indications and techniques for immediate placement and tissue augmentation.
